

CPAAMERICA INTERNATIONAL **CPE Training**

The purpose of CPAmerica's CPE training program is to provide superb CPE opportunities that meet all requirements of the National Association of State Boards of Accountancy (NASBA). Enhancements to our National Staff Training courses have been designed by our members for our members, providing outstanding training targeted to best meet the needs of our members' firm size. CPAmerica's CPE training opportunities have been called "the best available in the nation for firms our size."

Our tax and leveled A&A training covers a broad spectrum of courses available covering multiple topics.

Our training includes:

On-site partner-mentors for all A&A and tax courses

This volunteer partner-mentor arrangement augments the instructor's information by providing examples of real client situations using the concept taught in the class and highlighting opportunities for cross-selling, marketing and consulting.

Post-course CPE module for all A&A and tax courses

Participants can teach this module at their firms, improving retention of the course, allowing practice in the skill of presentation and providing the firm with greater CPE for the course registration fee.

Thorough review process

All A&A courses are third-party reviewed, and CPAmerica tax partners review all tax courses.

Together, CPAmerica and MAP (Making Auditors Proficient) have built a series of staff training courses that stress the decision-making process behind compilation, review and audit engagements and provide hands-on practice in live, field-tested case studies applicable to all firms and all audit approaches. CPAmerica members work with MAP to ensure the courses will meet the needs of every member firm.
